- Device configuration in bulk remotely
- Offline configuration and display of task status

Firmware Upgrade

- Firmware upgrade in bulk remotely
- Offline firmware upgrade and display of task status

Masses of Device Connections

- Highly-efficient solution for remote device management with connected devices up to 1000
- Simply connect to device through activation code or account

▶ Application Example

▶ Hardware Requirement

Your host hardware must meet the following minimum requirements:

For 500 devices

- CPU: 2 Cores, 2.0 GHz

- RAM: 16 GB

- Disk: 512 GB

- Bandwidth: ≥100MBps

For 1000 devices

- CPU: 8 Cores, 3.2 GHz

- RAM: 32 GB

- Disk: 1 TB

- Bandwidth: ≥100MBps

▶ Software Requirement

- O/S: Ubuntu 64-bit (Version 16)

- Supports installation packet

- Browser: Chrome, Firefox
